

Notes 11/9:

- Mockup A is the best
- Some sort of navigation should be added
- Remove rounded corners (too modern, need to look more 2000's)
- Consider making persistent popup
- Create navbar on the left side that follows user as they scroll
- Consider using more retro text, maybe Times for all text?
- Use absolute position instead of flexbox or grid for the authentic 2000's technology feel
- Create a subtitle and description of what My Immortal Is
- Make sure the text has spelling mistakes (stylize it like the original fanfic)
- Consider using internal references and jokes such as making the popup reference MCR (My Chemical Romance)
